

# Rishabh Mehra

Software Engineer (New Grad) | Backend & Full Stack  
(780) 563-0379 | rishabhmehra2710@gmail.com |  LinkedIn |  GitHub | Willing to Relocate

## SUMMARY

Computer Science graduate from the University of Alberta with experience in backend development, full-stack engineering, cloud infrastructure, and machine learning. Skilled in building reliable solutions for both enterprise and user-facing applications. Strong problem-solving, collaboration, and technical support skills gained through internships, research roles, and software projects.

## EDUCATION

### University of Alberta

*B.Sc. Specialization in Computer Science*

April 2026

Edmonton, AB

- Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Reinforcement Learning, Databases, Software Engineering, App Development

## EXPERIENCE

### University of Alberta

*Junior Research Analyst Co-op*

Edmonton, AB

May 2025 – Aug 2025

- Automated diagnostics and monitoring scripts across 50+ Linux systems using Python and Bash, reducing manual troubleshooting time and improving environment stability.
- Provisioned and maintained OpenStack-based virtual machines to support reliable execution of compute-intensive research workflows, documenting procedures for team-wide reuse.

### Elk Valley Resources

*Desktop Support Engineer Co-op*

Elkford, BC

Sep 2024 – Apr 2025

- Developed a centralized inventory platform for 15+ IT staff across 5 mine sites, implementing tiered access controls by site and seniority, replacing a fragmented manual process and improving visibility over 50+ hardware assets organization-wide.
- Automated ServiceNow work order generation for inter-site stock transfers and low-stock threshold alerts, eliminating 30+ manual tickets and saving 10+ hours per week in operational overhead.
- Engineered a QR code scan-to-log system for asset check-in/check-out, enabling full item traceability and reducing asset loss and operational costs across the desktop support team.

### Marquee Equity

*Software Engineering Intern*

New Delhi, India

May 2023 – July 2023

- Built reusable Python and SQL pipelines to clean, join, and query 1M+ records of investor and startup data, delivering dashboards and filtered match reports that improved investor-startup pairing accuracy.
- Designed and integrated RESTful APIs in Node.js with reusable React components in an agile environment, reducing page load times by 20% and improving overall application performance.

## PROJECTS

### Churn Analytics Pipeline | Python, Scikit-learn, Streamlit, KMeans, Gemini API (LLM)

Feb 2026 – Mar 2026

- Built an end-to-end churn prediction pipeline on 10,000 customers using 3 ML models, achieving 0.998 ROC-AUC to identify at-risk customers and prioritize retention outreach.
- Developed an interactive Streamlit dashboard to visualize model outputs and KPIs for non-technical stakeholders, integrating Google Gemini to auto-generate personalized retention emails from predictions.

### Forget Me Not (Care Companion) | React Native, TypeScript, Django, PostgreSQL, AWS

Sep 2025 – Nov 2025

- Built a cross-platform companion-matching application for elderly users, designing a PostgreSQL data model handling user profiles, caregiver verifications, real-time chat, and Stripe payment records.
- Delivered GPS safety tracking and an admin compliance dashboard, integrating third-party APIs and deploying on AWS for a secure, scalable production environment.

### Social Distribution Platform | Django, JavaScript, PostgreSQL, REST APIs

May 2025 – Aug 2025

- Built a decentralized social network federating posts and media across 5+ independent nodes, designing an inbox-driven architecture for public, private, and friends-only content distribution.
- Documented API integrations and system behaviour throughout development, ensuring consistent cross-node data synchronization and reliable content delivery across distributed services.

## SKILLS

**Languages:** Python, Java, C/C++, JavaScript, TypeScript, C#, SQL

**Frameworks and Platforms:** Django, React, React Native, Node.js, Express, Scikit-learn, Pandas, NumPy, Streamlit

**Cloud and Databases:** AWS (EC2, RDS), GCP, PostgreSQL, MongoDB, Firebase

**Tools and Practices:** Git, Docker, Kubernetes, CI/CD, Linux, Agile/Scrum, LLM Integration (Gemini API)
